Narrative:

Unless otherwise noted below or in the report and where applicable:

- Samples were received at the proper temperature and analyzed as received.
- Sample condition upon receipt is recorded on the chain-of-custody attached to this report.
- Results for all solid matrices are reported on a dry weight basis.
- Appropriate calibration and QC criteria were satisfactorily met.
- All applicable holding times for analytes have been met.
- Copies of the chains-of-custody, if received, are attached to this report.

QC batch D7759 had exceptions for 8081's on the MS/MSD RPD. The LCS and LCSD were acceptable, so the out of control was attributed to matrix.

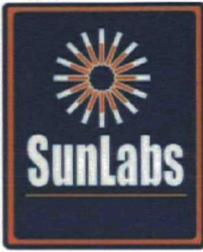

QC batch D7759 had an exception for Endosulfan sulfate on the LCS/LCSD RPD. All other QC was acceptable and all of the samples were non-detect for this analyte.

If you have any questions or comments concerning this report, please do not hesitate to contact us.

Narrative:

Unless otherwise noted below or in the report and where applicable:

- Samples were received at the proper temperature and analyzed as received.
- Sample condition upon receipt is recorded on the chain-of-custody attached to this report.
- Results for all solid matrices are reported on a dry weight basis.
- Appropriate calibration and QC criteria were satisfactorily met.
- All applicable holding times for analytes have been met.
- Copies of the chains-of-custody, if received, are attached to this report.

QC Batch D8152 had exceptions for 8081 on the Ms, MSD, and RPD. The LCS and LCSD were acceptable, so the out of control was attributed to matrix.

If you have any questions or comments concerning this report, please do not hesitate to contact us.
